

PETMATE: AI Companion Platform for the Elderly

Fostering Intergenerational Connections & Enhancing Mental Well-being

MOTIVATION & OBJECTIVES

CORE SYSTEM FEATURES

DISCUSSION & INSIGHTS

- **The Challenge:** Social isolation and declining physical activity among older adults.
- **The Goal:** Develop a multifunctional companion platform to address both the emotional and physical needs of the elderly through AI and gamification.

Persona-Based AI Conversation

- Powered by Natural Language Processing (NLP).
- Delivers natural, empathetic interactions tailored specifically for senior users.

Gamified Task System

- Promotes healthier daily routines.
- Encourages participation in both dynamic and static activities.

Emotional Rewards

- Users complete daily tasks to unlock pre-recorded messages from family members
- Bridges communication gaps and strengthens intergenerational bonds

- **Proven Impact:** User feedback shows the dynamic reward mechanism successfully alleviates isolation and connects seniors with the outside world.
- **Accessible Design:** Continuous UI/UX refinements have significantly lowered the technical barrier for older users.
- **Long-Term Health Tracking:** The system can monitor emotional states over time to generate professional Mental Health Trend Reports' for doctors and families.

PetMate

FUTURE WORK

- Optimize AI model performance
- Introduce customizable outfit options for different personas

CONCLUSION

Technology Meets Empathy: This project highlights the powerful potential of AI to deliver continuous emotional support, offering an innovative solution to enhance the mental well-being of older adults.
